

Is Now the Time to Replace That Ratty, Torn, Worn-out Seat?

Do you care about your back? **WE DO!**

Stop for a minute and consider just how long you do spend sitting in your tractor and combine each year. Lack of good lumbar support can cause unnecessary and painful backache that could lead to many other problems if left unchecked.

Quality seats can help alleviate pressures and vibrations that impede blood circulation, and cause muscle fatigue. So, if you don't think your back is worth the investment, contact the Missouri AgrAbility Project at 1-800-995-8503. We think we can convince you otherwise.

Which Seat Would You Rather Sit On?
