

Trellis Gardening

Agricultural Engineering Extension: Karen Funkenbusch, MA, and Willard Downs, Ph.D.

When constructing an adapted garden, vertical gardens, or trellis', provide an excellent option for those gardeners lacking in space. Trellis can be constructed almost anywhere, made out of almost any material. From store bought to found pieces, trellis are excellent places to grow climbing plants, such as ivy, as well as flowers and vegetables. Trellis can be adapted to different heights depending upon the needs of the individual.

For additional information contact your local Outreach and Extension Service or the University of Missouri-Columbia, 1.800.995.8503.
